Installation Information

A suitably qualified installer is required. Check product dimensions for correct height before commencing installation. The rangehood has a 1 metre cord with a 10 amp plug fitted. This is a simple plug in connection. Please also ensure the ducting hose is 150mm and no reducer is used as this will restrict the airflow and cause unnecessary noise and vibration. It is recommended the use of semi rigid or rigid ducting not flexi ducting. Improper installation is not covered under warranty.

WARANTY 2YEARS PARTS & LABOUR
